EDUCATION

B.E. in Artificial Intelligence and Data Science
CGPA: 8.8 / 10.0 | Graduating: 2026

TECHNICAL SKILLS

- Languages: Python, R, SQL
- Machine Learning & AI: Machine Learning, Deep Learning, NLP, Scikit-Learn, TensorFlow, Pandas
- Visualization & BI: Matplotlib, Seaborn, Power BI, Tableau
- Developer Tools: Git, Linux, Jupyter Notebook, Flask

PROJECTS

1. Customer Churn Prediction Engine
- Trained Random Forest and XGBoost classifiers on 10,000+ customer records.
- Achieved 89% accuracy and 0.85 F1-score with hyperparameter tuning in Scikit-Learn.
- Visualized feature importances and key attrition factors using Seaborn.

2. Biomedical Text Summarization using NLP
- Extracted medical research insights using Natural Language Processing and Hugging Face transf
- Deployed lightweight interactive web dashboard using Flask and Docker.

INTERNSHIPS

Data Science Intern | AnalyticsCorp (Jan 2026 - April 2026)
- Cleaned and transformed 500k+ transactional rows using Pandas and SQL.
- Created interactive Power BI dashboards monitored weekly by executive leadership.

CERTIFICATIONS

- Deep Learning Specialization (Coursera)
- Python for Data Science and Machine Learning (Udemy)
